ABOUT ME

Experience in both professional and personal projects, focusing on **emerging technologies** and **modern web development**.

I seek opportunities to **grow** and **learn** in the fields of **programming** and **AI**.

EXPERIENCE

Santander

Full Time - 5 mos - Hybrid

Full Stack Developer — Santander Global Tech

Mar 2025 - Present · 5 mos

- Part of the team building an internal wholesale lending application for Banco Santander, using DLX (Digital Loan Exchange) — a **specialized platform for managing the full lifecycle of syndicated and corporate loans**.
- While I have a technical background, I don't work on traditional frontend development. DLX provides its own UI through an SDK, so my **focus is on implementing business logic** and adapting flows to meet the bank's needs.
- I work mostly in TypeScript, configuring and extending the DLX SDK to:
 - **Model financial entities** like facilities, tranches, contracts, and participants.
 - Define custom validations, conditions, and workflow logic tailored to Santander.
 - Connect internal components and **manage complex lending scenarios**.
 - Automate repetitive tasks and **optimize business processes**.
 - I also collaborate with non-technical stakeholders to **turn legal and operational requirements into logic** that fits into the DLX ecosystem.

- What makes this role **unique** is the **exposure to the world of wholesale lending** : syndication structures, participant distribution, role assignment, financial events, and the contractual audit trail — all from a developer's perspective.

TECHNOLOGIES

TypeScript · DLX SDK · Node.js · Git · JavaScript

Nfq Advisory, Solutions, Outsourcing

Full Time - 3yrs 1 mos - Hybrid

Frontend Developer — Permira - GAIA

Feb 2024 - Feb 2025 · 1yrs

- Implemented Next.js with server-side rendering, **improving speed** in virtualized environments, **reducing load times** , and **enhancing the user experience on low-performance devices.**
- Using Tailwind and Zustand, I **redesigned the interface** , eliminated redundant code, and **optimized navigation and accessibility.**
- Vector knowledge base to facilitate **search in confidential documents** , a chat with image and document support, PDF viewer with summaries, etc...
- Integrated Okta SDK to ensure secure **authentication and robust data protection.**
- **Contributed to Python - based optimizations** , ensuring seamless frontend - backend integration and enhancing system efficiency.
- **Agile** Collaboration & International Communication: Worked in sprints, daily stand - ups, and retrospectives, managed tasks via ClickUp, and collaborated in English with the **UK - based client.**

Frontend Developer — Solutions

Feb 2023 - Feb 2024 · 1yrs

- Integral in Solutions' B2B apps: TRAFIS, SZENA, ALQUID, NETZERO.
- Skilled in Vuetify for **internal component libraries**.
- Expertise in **front-end tech** : Vue.js, Vuex, React.js, JavaScript, etc.
- Proficient in **Vue.js** and **React.js** for app development.
- Lead frontend logic and functionality, ensuring **deep application knowledge**.
- Collaborative in design for **efficient, reusable components**.
- Employ **separation of responsibilities** and **mixins** for **clear functionality**.
- Committed to **clean** , **modular** code for **easy maintenance**.
- Vue developer with a focus on advanced front-end skills and efficient component development.

TECHNOLOGIES

Full Stack Developer — Graphenus

Jan 2022 - Feb 2023 · 1yrs 1 mos

- Leveraged Angular for FrontEnd development, including **services** , **routing** , and **Angular Material**.
- Managed **Backend** tasks including **routing** , **controller maintenance** , and **database/API integration**.
- Ensured project **deployment** across **environments** and **version control** using Docker and Git/GitLab.
- Documented project processes and conventions for clarity and consistency.
- Facilitated user interaction on FrontEnd with clear information display and interactive input options.
